rec'd. 4/16/40

**IN TWO SECTIONS—SECTION TWO**

# Index to Volume Twenty-One of The Paper Industry and Paper World

## April, 1939—March, 1940

**Page numbers in this index are preceded by numbers of the issues. April, 1939, is No. 1 and March, 1940, is No. 12**

**A**

Absorption systems, vapor (See Drying of Paper on the Machine, Chap. 18)
Acid for combined, testing sulphite....12, 1266
Acid, pulping with nitric
Part I—The production of pulp by the nitric acid process..... 1, 41
Part II—Products other than cellulose, obtained by the action of nitric acid on plant materials... 2, 151
Part III—Economics of the process 3, 335
**Adams, Stanley R.***
Air (See Drying of Paper on the Machine, Chap. 3)
Alum solutions, temperature relationships for—Specific gravity..... 6, 657
Alum test, a practical.....10, 1083
Analysis of specks (See Spots and Specks in Paper)
Arc welding in pulp and paper mills.. 7, 753
**Arnold, L. K.,** Pressure-molded fiber products from cellulosic materials... 7, 760
**Aronovsky, S. I.,** J. David Reid, E. C. Dryden, E. R. Whittemore, and D. F. J. Lynch, Pulping with nitric acid.
Part I—The production of pulp by the nitric acid process..... 1, 41
Part II—Products other than cellulose, obtained by the action of nitric acid on plant materials 2, 151
Part III—Economics of the process 3, 355
(See also E. C. Dryden)
(See also Convention Papers, Abridged)

**Association Meetings**
American industry declares its principles (National Association of Manufacturers) .....10, 1046
A.P.P.A. annual meeting reviews past . . . looks to future.....12, 1276
At the Superintendents 20th birthday party ..... 4, 446
Atlantic City host to Safety Congress (N.S.C.) ..... 8, 875
Canadian Association holds highly successful meeting .....11, 1172
Divisional meetings held by sixteen groups .....12, 1296
Old-Timers meet with Michigan Supers ..... 3, 346
Paper is keystone of world today.12, 1268
Salesmen's Association is twenty-one years of age.....12, 1292
T.A.P.P.I. celebrates its silver anniversary .....12, 1282
Technical talks and tours thrill Tappi ..... 7, 766
Wisconsin Valley safety conference ..... 4, 506
**Aubin, A. J.,** and H. W. French, Dryer frame of welded design.....10, 1082

**B**

**Bailey, A. J.,** Fold failure in kraft paper 2, 156
**Baird, P. K.*—Baldwin, Paul C.***
Bark shives (See Spots and Specks in Paper)
**Barry, T. M.***
**Baxter, B. M.,** Drying of Paper on the Machine (Supplement)
**Baxter, Jr., Joe*—Bingham, R. T.*—Blanchard, Stanley W.***
Bogalusa, how they planned modernization at ..... 3, 329
**Bogart, H. N.,** and D. S. Davis, Specific gravity—Temperature relationships for alum solutions..... 6, 657
Boyce Thompson Institute, cellulose research at the.....12, 1265
**Brainerd, Forrest W.*—Braun, F. W.*—Bray, M. W.*—Brown, W. E.***
Budgeting research and development.12, 1255
**Butterfield, John V.,** Practical notes on photomicrography .....12, 1258
**Butz, Ralph H.,** Obsolescence reserve is management's problem ..... 4, 419

**C**

**Card, H. S.,** Arc welding in pulp and paper mills ..... 7, 753
**Carpenter, Charles***
Cartons best for packing furniture, fiber 4, 460
**Caulfield, J. G. L.***
Cell-wall structure, infrared photomicrography reveals plant.....11, 1159
Cellulose research at the Boyce Thompson Institute .....12, 1265
Cellulosic materials, pressure-molded fiber products from..... 7, 760
**Chaplin, M. P.,** The molded pulp industry ..... 5, 567
**Chidester, G. H.*—Chilson, Warren A.***
Chipper design, a new theory of.....12, 1264
Chlorination pulping of spruce wood..10, 1075
Classification of specks (See Spots and Specks in Paper)
Coated and uncoated offset papers.... 2, 149
**Coghill, James***
Colored broke spots (See Spots and Specks in Paper)
Condensation of steam in dryers (See Drying of Paper on the Machine, Chap. 10)
Conditions inside the dryer (See Drying of Paper on the Machine, Chap. 7)
Container tops again..... 8, 868

**CONVENTION PAPERS, ABRIDGED**

**American Chemical Society**
Effect of wetting agents upon the treatment of wood with aqueous solutions, Alfred J. Stamm and Wilbur H. Petering..... 7, 796
Heat of adsorption of water by papers, C. C. Houtz and D. A. McLean 7, 794
Hydrogenation of lignin in aqueous solution, Elwin E. Harris, Jerome Seaman, and E. C. Sherrard..... 7, 794
Products and micro-organisms involved in the thermophilic fermentation of cellulosic materials, F. E. Fontaine, W. H. Peterson, and George J. Ritter..... 7, 796
Pulp strength and fiber structure, William Seifriz and Charles W. Hock ..... 2, 176
Purified wood cellulose, George A. Richter ..... 2, 174
Reactions of the ash constituents of insulating papers, D. A. McLean.. 2, 176
Southern pines and hardwoods as sources of cellulose, Charles Carpenter and Frank McCall..... 2, 176
The absence of the piperonyl group in the lignin structure, M. J. Hunter and Harold Hibbert..... 7, 794
The action of aqueous solutions of chlorine on isolated lignins and on cellulosic pulps, E. V. White, J. N. Swartz, Joseph L. McCarthy, and Harold Hibbert ..... 2, 174
The action of ozone on isolated lignins, Rodger M. Dorland, W. Lincoln Hawkins, and Harold Hibbert 7, 794
The chemical and physical characteristics of various pulps, S. I. Aronovsky and E. C. Dryden..... 2, 174
The degree of aggregation of dyestuffs in vat dyeing of cellulose, Emmerich Valko ..... 2, 176
The effect of various insulating material on cellulose, H. C. P. Weber. 2, 176
The uses of cellulose as an insulating material, G. T. Kohman..... 2, 174
The utilization of waste lignin, Elwin E. Harris..... 7, 794

**American Pulp and Paper Mill Superintendents Association**
Bleaching kraft pulp, Thomas W. Toovey ..... 6, 686
Coated paper finishing, Ward Wheeler ..... 6, 688
Converting waste rags and strings into papermaking fibers, E. C. Gildenzopf ..... 4, 490
Cost and standards in finishing room operations, William Riegers..... 6, 684
Effect of atmospheric humidity on paper and printing, W. H. Dahl... 4, 488
Efficient water removal with rubber covered rolls, W. E. Brown..... 4, 500
Engineers and stuff preparation, D. Manson Sutherland, Jr..... 5, 588
High speed refining, Edward M. Root ..... 5, 586
Making calcium in water behave, R. E. Hall..... 5, 590
Management and control, Arthur B. Green ..... 4, 502
Modifying sheet characteristics through starch application in the tub, R. D. Smith..... 6, 684
New ideas on the use of salt cake in kraft pulp mills, Walter L. Savell 9, 1006
Our amazing industry, George K. Gibson ..... 6, 678
Paper defects, L. K. Johnson..... 4, 484
Paper machine filming processes, Peter J. Massey..... 6, 682
Shipping paper safely to customers, W. L. Ennis..... 5, 586

(*) **See Convention Papers, Abridged**

Tech

Some applications of corrosion resisting metals and alloys in the pulp and paper industry, F. L. La Que ..... 4, 494
Steam turbines for paper mill application, K. S. Kramer..... 6, 678
Technical control in the tissue industry, H. D. Cook..... 5, 591
The development of flexible doctors, F. W. Lodding..... 6, 690
The dryer felt, Charles K. Dillingham ..... 4, 502
The handling of paper in the government printing office, George Ortleb 4, 484
The use and value of instruments in the sulphite pulp process, C. D. De Mers ..... 4, 494
Tomorrow's stock preparation—today, Joe Baxter, Jr. ..... 6, 674
Waste paper prepared by the double selective screening system, Arno W. Nickerson ..... 4, 490
Wet end drives for board machines, F. M. Roberts ..... 4, 490

**Canadian Pulp and Paper Association**

Effect of grinding consistency and temperature using a miniature grinder, H. Andrews.....11, 1180
Forced digester circulation and chip packing, L. C. Kelley.....11, 1183
Mechanization of logging operations, A. Koroleff .....11, 1180
Practical hints on mechanical pulping for newsprint, J. B. Brown.....11, 1180
Slime control at the Ontario Paper Co., Ltd., J. M. Forrester and E. G. Kirby .....11, 1180
The effect of chipping on the suitability of wood for sulphite cooking, H. Green and F. H. Yorston..11, 1183
The effect of war conditions on the pulp and paper industry, Paul Kellogg .....11, 1183
The effect of white-water loss in the testing of mechanical pulp, W. S. Morris and R. DeMontigny.....11, 1180

**National Safety Council**

Back injuries in the paper industry, their cause and prevention—from the medical director's viewpoint, Dr. J. B. MacLaren..... 8, 892
Back injuries in the paper industry, their cause and prevention—from the safety director's viewpoint, Walter E. Strong..... 8, 892
Hand injuries—their cause and prevention, James J. Pizak..... 9, 1004
How can job analysis and merit rating help solve your accident and prevention problems, C. R. Dooley ..... 8, 896
The supervisor's place on the safety program—from the viewpoint of the mill manager, T. M. Barry.... 8, 892
The supervisor's place on the safety program—from the viewpoint of the mill worker, J. V. Pavlis..... 8, 894
Value of accident statistics, F. W. Braun ..... 9, 1006

**Southern States Pulp and Paper Club**

Conditioning water for the paper mill, Eskel Nordell..... 2, 168
Planning and orderly development of South's industry advocated, D.C. Everest ..... 2, 168
Some phases of pine forest management for pulpwood, Frank Heyward, Jr. ..... 2, 170
What are we going to do with our hardwoods? Captain I. F. Eldredge 2, 173

**Technical Association of the Pulp and Paper Industry**

A method for the measurement of the angle of contact formed between a liquid surface and a fiber, and the application of this and swelling data to pore diameter measurements, James E. Foote..... 7, 780
A new fiber classifier and its applications, Forrest W. Brainerd..... 1, 72
A photronic brightness tester, opacimeter and gloss meter, Stanley W. Blanchard ..... 1, 71
A study of calcium carbonate, clay, and casein coating mixtures affecting certain sheet characteristics, A. E. Hughes and H. F. Roderick.. 9, 997
A study of the drainage characteristics of papermaking fibers, C. H. Heigl and W. O. Hisey..... 7, 776
Anti-friction bearings for paper machinery, R. H. Demott..... 1, 73
Application of a quantitative technique to the evaluation of color stability of bleached pulp. Influence of machine drying and natural aging upon this evaluation, James W. McIntyre..... 8, 902
Bleaching procedure design for high white strength kraft, Warren A. Chilson ..... 8, 903
Comparative resistance to vapor transmission of commercial building papers, M. Heinig, L. V. Teesdale, and C. E. Curran..... 1, 64
Consistency and weight regulation of stock to the paper machine, Frederick Wierk .....12, 1304
Cross-sectional dimensions of fibers in relation to papermaking properties of loblolly pine, J. C. Pew and R. G. Knechtges ..... 7, 782
Drainage characteristics of pulps and stuffs: The effect of acids and other electrolytes on freeness, Stanley R. Adams, F. A. Simmonds, and P. K. Baird..... 1, 76
Drying rate for book and other printing papers, A. E. Montgomery.... 1, 75
Drying rates for paperboard, A. E. Montgomery ..... 1, 75
Effect of filler brightness on lined board brightness, W. R. Willets, R. T. Bingham, and L. H. Eriksen. 9, 996
Effect of rate of feed of wood to stone at various stone surface speeds in the groundwood process, E. R. Schafer and J. C. Pew..... 7, 791
Effect of the wood-stone contact area in the groundwood process, E. R. Schafer and J. C. Pew..... 7, 791
Engineering and construction for pulp and paper mills, H. K. Ferguson .....12, 1322
Frequent errors in stock preparation, Arthur B. Green..... 1, 67
Glycerine in paper, Georgia Leffingwell and Milton A. Lesser..... 1, 62
Growth factors influencing the value of jack pine for kraft and sulphite pulps, G. H. Chidester, M. W. Bray, and C. E. Curran..... 7, 791
Industry and leadership, R. A. Hayward .....12, 1302
Influences of paperboards and adhesives on strength properties of corrugated fiberboards, D. W. McCready .....12, 1314
Metallurgical control in the fourdrinier wire industry, D. C. Dilley 12, 1306
Microbiological control in pulp and paper manufacture, R. B. Martin and A. E. Griffin..... 9, 998
Our patent system, Charles W. Rivise .....12, 1302
Paper quality in relation to printing, R. H. Simmons..... 1, 70
Planted red pine as related to pulpwood yields North and South, E. F. McCarthy ..... 7, 783
Properties of wet fiber mats: Relation of recovery from compressive deformation to sheet properties, C. O. Seborg, F. A. Simmonds, and P. K. Baird ..... 1, 76
Refining pulp screenings with the Noblewood mill, N. S. Grant..... 1, 64
Relation between delignification and strength characteristics of very raw pulps, Harry F. Lewis and Charles A. Richardson II..... 7, 776
Relation of lignin content to the strength of paper and boards—I. literature survey and progress report, Edwin C. Jahn and C. V. Holmberg ..... 7, 778
Retention of fillers, S. W. Martin and W. R. Willets .....12, 1319
Some aspects of white water flocculation, Edward N. Poor.....12, 1320
Some of the factors influencing the selection of mill sites in the South, D. G. Moon..... 1, 74
Some speculations on fundamentals in refining power requirements, A. S. Cosler..... 1, 72
Stains for determining the degree of cooking, the degree of bleaching, and the purity of pulp, John H. Graff ..... 7, 776
Study of friction between solid surfaces and moving paper stock suspension, Paul C. Baldwin and J. A. Van Den Akker ..... 1, 73
The absorption of sulphur dioxide in water, L. C. Jenness and J. G. L. Caulfield ..... 7, 786
The advantages of microbiological control in pulp and paper manufacture, J. R. Sanborn..... 9, 1003
The design of gas absorption equipment for the production of chlorine water, Roy P. Whitney and Edward Vivian .....12, 1310
The effect of particle size on the efficiency or a rosin suspension as measured by the retention of rosin and the degree of sizing imparted to paper, Firth Dennett and C. E. Libby ..... 9, 994
The effect of water hardness on the formation of floc from sodium aluminate, Lewis B. Miller and Ralph L. Lanz .....12, 1316
The fluorescence size test, an improved method and a new instrument for measuring the water resistance of paper, J. A. Van Den Akker, Philip Nolan, A. C. Dreshfield and H. F. Heller..... 9, 994
The lime-chlorine system in the preparation of calcium hypochlorite, J. D. Rue and F. W. O'Neil..... 8, 900
The location of potential reducing substances in woody tissues, S. Coppick and W. Frank Fowler, Jr. 7, 778
The manufacture and uses of chlorine, Paul A. Keene..... 8, 899
The Noblewood mill, James Coghill. 1, 64
The preservation of records, Arthur E. Kimberly ..... 1, 67
The printability of paper, G. L. Larocque ..... 1, 68
The suitability of red pine for the manufacture of sulphite pulps, John Studeny and C. E. Libby... 7, 784
The use of superheated water in manufacturing and converting plants, Jean F. Gschwind..... 1, 76
The use of waxes and case testing ink in testing printing papers, William A. Kirkpatrick II..... 1, 68
Turbulence in disc refiners, D. Manson Sutherland, Jr..... 1, 62
Water retention of beaten and gelatinized pulp, Arthur Sedoff, C. V. Holmberg, and Edwin C. Jahn.... 1, 62
Yield and viscosity of holocellulose and some of its cellulosic fractions, Wm. G. Van Beckum and George J. Ritter ..... 7, 778
**Cook, H. D.*—Coppick, S.*—Cosler, A. S.***
**Cousins, C. R.**, and D. S. Davis, Note on freeness interconversion ..... 2, 160
Creative imagination in research..... 9, 978
**Curran, C. E.***
**Current Thought**
A broader perspective.....12, 1246
A few years ago and today..... 4, 412
"American Christmas" ..... 9, 958
An amazing miracle.....11, 1152
Don't sell the future short..... 7, 746
"Good times will come again"... 5, 560
It's the little things that count.... 2, 140
Random thoughts .....3, 324; 8, 850
Retrospection and introspection...10, 1070
395 m.p.h. or 180,000 m.p.m. .... 1, 32
World War II..... 6, 648
Cutting, paper ..... 5, 573

**D**

**Dahl, W. H.***
Dard Hunter paper museum..... 6, 660
dedicated by M.I.T. ..... 4, 397

---

**(*) See Convention Papers, Abridged**

670.5
v.21 April 1939-March 1940

**Davis, D. S.** (See H. N. Bogart and C. R. Cousins)
**De Mers, C. D.*—Demott, R. H.*—Dennett, Firth***
Design, a new theory of chipper.....12, 1264
Development, budgeting research and.12, 1255
**Dilley, D. C.*—Dillingham, Charles K.***
Direction, technical ..... 4, 417
Distended fiber board, making..... 1, 51
**Donnally, L. H.**, A practical alum test.10, 1083
**Dooley, C. R.*—Dorland, Rodger M.***
**Dreshfield, A. C.***
**Dryden, E.C.**, S. I. Aronovsky, and T. D. Jarrell, Utilization of farm wastes for paper and board making..... 9, 972
(See also Convention Papers, Abridged)
(See also S. I. Aronovsky)
Drying frame of welded design.....10, 1082
**Drying of Paper on the Machine** (Supplement, see B. M. Baxter)..... 2,Part 2
Chapter 1—Steam ..... 2, 207
Chapter 2—Effect of air in steam.. 2, 208
Chapter 3—Air ..... 2, 210
Chapter 4—Dryer drainage systems 2, 212
Chapter 5—Flash steam ..... 2, 218
Chapter 6—Vacuum drying ..... 2, 228
Chapter 7—Conditions inside the dryer ..... 2, 228
Chapter 8—Variation in drying rate with pressure ..... 2, 232
Chapter 9—Rate of progress of drying ..... 2, 234
Chapter 10—Condensation of steam in dryers ..... 2, 240
Chapter 11—Effect of pressing on drying capacity .... 2, 242
Chapter 12—Dryness after pressing. 2, 250
Chapter 13—Effect of freeness of stock on drying rate. 2, 253
Chapter 14—Dryer felts ..... 2, 254
Chapter 15—Influence of condition of contact of sheet with dryer surface.. 2, 254
Chapter 16—Influence of length of draw from dryer to dryer ..... 2, 258
Chapter 17—Influence of thickness of sheet on drying rate ..... 2, 260
Chapter 18—Vapor absorption systems ..... 2, 264
Chapter 19—Machine room ventilation ..... 2, 269
Chapter 20—Ventilators ..... 2, 280
Chapter 21—Drying rates, condensation rates and tests. 2, 283
